

PowerImport

Client-Project-Contact import/modify utility

From CLI - the Time & Billing Specialists

- **Import Clients, Projects, Contacts, and transactions into PowerPM**
- **Reads Excel, Tab or Comma delimited files** — field headers provided.
- **Modify information prior to upload into PowerPM database** — edit cells, include or exclude rows from the upload, delete unwanted columns.
- **Modify existing PowerPM data** — use in conjunction with PowerView to extract selected files, make changes as required and load back into PowerPM - for example reallocate management responsibilities for a retiring partner.
- **Extensive data validation** — ensures uploaded data meets PowerPM requirements.
- **Detailed log of activity** — allows review and correction of data as necessary.

Price: Included with PowerPM
