

PowerPM Hosted Solution

Powerful, Flexible, Integrated Practice Management

The **Hosted Solution** for **PowerPM** provides our clients with the benefits of Software as a Service maintained and managed by Commercial Logic on servers optimized for this purpose.

Subscribers have the benefits of a “cloud solution” that is not stored on some random server at an unknown location but carefully maintained in Commercial Logic’s own datacenter and disaster recovery fail-over site.

Frequently asked questions:

How does it work? You launch PowerPM from an RDP shortcut on your desktop. This sets up a secure connection to our Gateway server, which authenticates you and starts a Remote Desktop session with our PowerPM server and your PowerPM database. It appears on your screen just as when launched on-premises.

What about TrakTime? Browser-based TrakTime Web for time and expense capture is available online anytime, anywhere. TrakTime Mobile supports Apple and Android devices.

What about performance? Our optimized servers generally out-perform the on-premises system they replace.

What if the Internet is down at my office? You can work from home or the library or the local Starbucks. For security you need to tell us to whitelist those locations.

What about security? Is it secure? Yes. Secure enough for a large bank to opt for the Hosted Solution! Technical details available on request.

What the cost? There is a one-time setup fee and a monthly subscription fee based on the number of licensed timekeepers. See [Hosted Solution Policies](#).

PowerPM is only offered as a Hosted Solution Service!

Hosted Solution benefits:

- ◆ Anywhere/anytime access to your PowerPM database
- ◆ Connection from Macs and other non-PC devices
- ◆ Optimized hardware and software for PowerPM
- ◆ Superior technical support
- ◆ Operation with the latest software releases
- ◆ Disaster recovery and daily backup
- ◆ Automatic scale-up as your firm grows
- ◆ Removes the overhead of PowerPM and TrakTime from your network and your IT team.
